Sale RAM Details

147 Elite SRS® Poll Merino rams

3 Elite SRS® Horn Rams

Aug-Sept 2022 drop

Shorn 18th April 2023

Tested 28th August 2023

Inspection 9:30am

Sale 1pm

Directions

From Wellington take the Mudgee Road for 5 km.

Then take the 12 Mile Road for a further 24 km, take turn to right sign posted "Glenwood Woolshed" and Glenwood Merinos. Or Google "Glenwood Merinos".

Welcome

We would like to welcome everybody to our 22nd on Property Ram Sale, we are very proud of the sale team this year which exhibit the trademark SRS® wools combined with cutting edge carcass, welfare, reproduction, and resilience traits required for our future merinos.

This year we have included the new research index called Sustainable High Rainfall Merino(SMHR) which we believe better reflects where we need be as an enterprise moving forward. We have also included reproduction traits which are broken down from the old Number of Lambs Weaned(NLW) to better understand where fertility and lamb survival is coming from.

For the first time all rams presented have been DNA tested to determine pedigree and to further cement the accuracy of breeding values, and give poll status.

All Rams in the sale this year have been assessed using the Classimate app for visual wool, structure, and welfare traits which will be available on the website and also on sale cards on the day for people to make more informed breeding decisions.

We hope everybody enjoys the day as much as we enjoy presenting them, and that the rams you purchase are successful in your flocks and lead you to a more productive, profitable, and easy care enterprise.

Kind Regards,
Norm & Pip

A Customer is the most important visitor on our premises, he is not dependent on us. We are dependent on him. He is not an interruption in our work. He is the purpose of it. He is not an outsider in our business. He is part of it. We are not doing him a favour by serving him. He is doing us a favour by giving us an opportunity to do so.
— Mahatma Gandhi

Disclaimer:

Measurements provided are to be used as a guide only. The vendor and their agents accept no responsibility for the accuracy nor the repeatability of the fleece production information supplied with the rams in this sale.

Outside Agents

There is a 2% rebate to outside agents nominated by the buyer at the sale and settling within seven days.

Thanks to Rabobank Dubbo who are kindly supplying a few refreshments after the sale. Please join us!

Understanding ASBVs

Glenwood is collecting carcass performance data to improve the meat and fertility attributes of the flock. Through the collection of live weights from weaning to yearling and meat scanning (by accredited scanner) combined with improved pedigree recording we are finding enormous benefits for our own enterprise and in turn for our ram clients.

ASBVs are simple and easy tool to use and provide higher genetic gain.

Weaning Weight (WWT)

Weaning weight (WWT) describes the genetic difference in liveweight measured at weaning age. WWT is expressed in kilograms (kg).

The free lunches

- ✓ Marketable at earlier ages
- ✓ higher reproductive output
- ✓ higher lean meat yield
- ✓ higher fleece weight

Things to watch

- ❗ increase in adult weight
- ❗ lamb birthweight increases
- ❗ fibre diameter goes up

Yearling Fat Depth (YFAT)

Yearling fat depth (YFAT) describes the genetic difference between animals for fat depth measured at yearling age. YFAT is expressed in millimeters (mm)

The free lunches

- ✓ improved eating quality
- ✓ improved condition score

Things to watch

- ❗ reduced lean meat yield
- ❗ fleece weight goes down

Yearling Eye Muscle Depth (YEMD)

Yearling eye muscle depth (YEMD) describes the genetic difference between animals for eye muscle depth measured at yearling age. YEMD is expressed in millimeters (mm)

The free lunches

- ✓ lean meat yield
- ✓ dressing percentage
- ✓ worm resistance

Things to watch

- ❗ growth
- ❗ eating quality

Yearling Fibre Diameter Coefficient Of Variation (YDCV)

Yearling fibre diameter coefficient of variation (YDCV) describes the genetic difference between animals for fibre diameter CV measured at yearling age. YDCV is expressed as a percentage (%)

The free lunches

- ✓ resistance to worms
- ✓ staple strength
- ✓ reduced fleece rot
- ✓ less body strike

Things to watch

- ❗ lower fleece weight

Yearling Worm Egg Count (YWEC)

Yearling worm egg count (YWEC) describes the genetic difference between animals for worm egg count measured at yearling age. YWEC is expressed as a percentage (%)

The free lunches

- higher muscling
- higher staple strength

Things to watch

- nothing

Yearling Staple Length (YSL)

Yearling staple length (YSL) describes the genetic difference between animals for staple length measured at yearling age. YSL is expressed in millimeters (mm).

The free lunches

- fleece weight improves
- higher growth
- less fleece rot

Things to watch

- reduced reproduction
- higher fibre diameter

Weaning Rate (WR)

Weaning Rate (WR) describes the genetic difference between animals for the number of lambs weaned per ewe joined, as an adult. WR is expressed as number of lambs.

The free lunches

- N/A

Ewe Rearing Ability (ERA)

How successfully did the ewe rear her litter? Sires with higher ERA will produce daughters which rear more of their litter.

The free lunches

- Higher lamb survival
- More muscle and fat

Sustainable Merino High Rainfall - Research Index (SMHR)

SMHR estimates the genetic differences between animals against a production system that focuses on meat production, wool production, reproduction and growth, with additional emphasis on welfare traits such as wrinkle, worm egg count and dag in a self-replacing Merino flock.

Suitable for

- A production system where the income is a combination of meat
- wool
- reproduction and welfare traits.

Traits used to calculate index

- clean fleece weight (CFW)
- fibre diameter (FD)
- staple strength (SS)
- yearling weight (YWT)
- adult weight (AWT)
- lean meat yield (LMY)
- worm egg count (WEC)
- reproduction (CON, LS, ERA)
- breech wrinkle (EBWR)
- dag (DAG)
- condition score (CS)

Accuracies

The accuracy for each measured trait is listed next to the ASBV as a percentage. **The higher the figure the more accurate it is.** This is determined by such things as known sire and dam linkage, pedigree and the number of animals measured.

The measurements can change over time as more information and progeny are measured, however the higher the accuracy the less the value should move.

Report: Merino Percentile Bands – 07/09/2023

Taking home and caring for your Genetic investment

- ✓ Take care of the Glenwood ram when travelling home, transport stress may put him off , have a good stock crate and tarp if there is bad weather or travelling long distances.
- ✓ When you get the new ram home put him in a shaded paddock with plenty of feed and clean water, he is a highly productive animal and will be expected to mate up to 100 ewes.
- ✓ Give him time to adjust to his new home, try to give him 6 weeks before joining him.
- ✓ Plan to shear drench and vaccinate him well before joining.
- ✓ Shear him twice a year and allow 8 weeks before joining, treat as a preventative on the horns with Clik to avoid any risk of flies.

Maximising the Genetic potential

- ✓ It takes about 7 weeks from when sperm is made to when it is available. This means in a 5 to 6 week join all sperm will have already been made before hand.
- ✓ Bring your ram in at least 8 weeks before joining for a health and testicle check. It is too late after this time to fix any problems.
- ✓ Feeding a high protein grain like lupins prior to joining at about 500 grams per day can help with his fertility.
- ✗ Do not allow your ram to be over fed or get to fat this can effect his short and long term fertility as well as his mobility.

With acknowledgment to Adam Mort of Hilltop for putting this together.

All Glenwood rams have been treated with the following:

- ✓ Vaccinated with 6 in 1 as lambs and a booster in 28/08/2023
- ✓ Backlined with Avenge 18/04/2023
- ✓ Drenched with Avomec Dual 15/8/2023
