Sale RAM Details

140 Elite SRS[®] Poll Merino rams

Aug 2025 drop

Shorn 29th April 2026

Tested 3RD September 2026

Inspection 9:00am

Sale: 1pm

Directions

From Wellington take the Mudgee Road for 5 km.
Then take the 12 Mile Road for a further 24 km, take turn
to right sign posted "Glenwood Woolshed" and
Glenwood Merinos. Or Google "Glenwood Merinos".

2023 sale topper

Welcome

We would like to welcome everybody to our 25th On Property Ram Sale, as a family business we are extremely proud of the genetics we produce and this year's sale team is no exception exhibiting the trademark SRS® wools combined with cutting edge carcass, welfare, reproduction, and resilience traits required for our future merinos.

All of the rams are presented straight out of the paddock and due to an extremely dry Autumn have been fed pellets through from March. We pride ourselves on presenting sheep straight out of the paddock, but also understand the need to exhibit well grown animals for sale.

The sale team have never had a foot trimmed and as a part of our breeding objective we breed animals which are comfortable in their environment meaning they are highly resistant to fly strike and to worm infestations.

And as always we guarantee all of the rams and offer classing advice to anybody who would like it. We would like to encourage as many ram buyers as possible to consider completing a DNA Flock Profile of their ewe Hoggets which gives a comprehensive summary of your flocks predicted breeding values, and enables you to make better informed decisions at the ram sale.

If you are interested please get in touch, and if you are an SRS® member there is a discount available.

We hope everybody enjoys the day as much as we enjoy presenting them, and that the rams you purchase are successful in your flocks and lead you to a more productive, profitable, and easy care enterprise.

Kind Regards,
Norm, Pip and William

Disclaimer:

Measurements provided are to be used as a guide only. The vendor and their agents accept no responsibility for the accuracy nor the repeatability of the fleece production information supplied with the rams in this sale.

Outside Agents

Outside agents will be offered a rebate of 2% where buyers are introduced to Peter Milling & Company (the selling agents) by email livestock@petermilling.com.au 24 hours prior to sale. Elders contact — Florance.McGufficke@elders.com.au

Thanks to Rabobank Dubbo who are kindly supplying a few refreshments after the sale. Please join us!

Understanding ASBVs

Glenwood is collecting carcass performance data to improve the meat and fertility attributes of the flock. Through the collection of live weights from weaning to yearling and meat scanning (by accredited scanner) combined with improved pedigree recording we are finding enormous benefits for our own enterprise and in turn for our ram clients.

ASBV's are simple and easy tool to use and provide higher genetic gain.

YWT (Yearling Weight)*

Estimates the genetic difference between animals in live weight at 360 days of age.

The higher the value the better.

** Rams with more positive WT ASBVs produce progeny that grow quicker and are heavier at an earlier age.*

Yearling Fat Depth (YFAT)

Yearling fat depth (YFAT) describes the genetic difference between animals for fat depth measured at yearling age. YFAT is expressed in millimetres (mm)

The free lunches

- ✓ improved eating quality
- ✓ improved condition score

Things to watch

- ⚠ reduced lean meat yield
- ⚠ fleece weight goes down

Yearling Eye Muscle Depth (YEMD)

Yearling eye muscle depth (YEMD) describes the genetic difference between animals for eye muscle depth measured at yearling age. YEMD is expressed in millimetres (mm)

The free lunches

- ✓ lean meat yield
- ✓ dressing percentage
- ✓ worm resistance

Things to watch

- ⚠ growth
- ⚠ eating quality

Yearling Fibre Diameter Coefficient Of Variation (YDCV)

Yearling fibre diameter coefficient of variation (YDCV) describes the genetic difference between animals for fibre diameter CV measured at yearling age. YDCV is expressed as a percentage (%)

The free lunches

- ✓ resistance to worms
- ✓ staple strength
- ✓ reduced fleece rot
- ✓ less body strike

Things to watch

- ⚠ lower fleece weight

Yearling Worm Egg Count (YWEC)

Yearling worm egg count (YWEC) describes the genetic difference between animals for worm egg count measured at yearling age. YWEC is expressed as a percentage (%)

The free lunches

- ✓ higher muscling
- ✓ higher staple strength

Things to watch

- ! nothing

Yearling Staple Length (YSL)

Yearling staple length (YSL) describes the genetic difference between animals for staple length measured at yearling age. YSL is expressed in millimetres (mm).

The free lunches

- ✓ fleece weight improves
- ✓ higher growth
- ✓ less fleece rot

Things to watch

- ! reduced reproduction
- ! higher fibre diameter

Weaning Rate (WR)

Weaning Rate (WR) describes the genetic difference between animals for the number of lambs weaned per ewe joined, as an adult. WR is expressed as number of lambs.

The free lunches

- ✓ N/A

Ewe Rearing Ability (ERA)

How successfully did the ewe rear her litter? Sires with higher ERA will produce daughters which rear more of their litter.

The free lunches

- ✓ Higher lamb survival
- ✓ More muscle and fat

Accuracies

The accuracy for each measured trait is listed next to the ASBV as a percentage. The higher the figure the more accurate it is. This is determined by such things as known sire and dam linkage, pedigree and the number of animals measured.

The measurements can change over time as more information and progeny are measured, however the higher the accuracy the less the value should move.

Glenwood Merinos — Ranked equal 11th over all Merino Studs in Australia for Data Quality

SRS index

The SRS index is a selection index that aims to highlight the animals that carry a balance of ASBVs representing the SRS breeding objective. This is a combination of production, quality and resilience traits.

A key point of difference for the SRS merino is a superior wool quality, on a wrinkle free skin, that minimises the instances of fleece rot and flystrike. This is represented with the inclusion of traits such as CV, staple strength, colour, curvature, strength, length and micron.

Doing-ability is likely the best term to describe a ewes ability to remain

reproductively fit when challenged and produce fast growing and earlier finishing lambs. This is represented with the inclusion of growth, fat and muscle, as well as WEC and weaning rate.

IMF (Intramuscular Fat) for eating quality, has also been included to ensure we are selecting for animals that will again drive production, whilst maintaining a quality product into the future.

True performance is when an animal can offer real production even when under varying environmental challenges. The SRS index captures many important traits in a balanced way for easier selection.

Taking home and caring for your Genetic investment

- ✓ Take care of the Glenwood ram when travelling home, transport stress may put him off, have a good stock crate and tarp if there is bad weather or travelling long distances.
- ✓ When you get the new ram home put him in a **shaded paddock** with **plenty of feed and clean water**, he is a highly productive animal and will be expected to mate up to 100 ewes.
- ✓ Give him time to adjust to his new home, **try to give him 6 weeks** before joining him.
- ✓ Plan to Shear drench and vaccinate him well before joining.
- ✓ **Shear him twice a year and allow 8 weeks before joining**, treat as a preventative on the poll with Clik to avoid any risk of flies.

Maximising the Genetic potential

- ✓ It takes about 7 weeks from when sperm is made to when it is available. This means in a **5 to 6 week join all sperm will have already been made before hand**.
- ✓ Bring your ram in at least **8 weeks before joining for a health and testicle check**. It is too late after this time to fix any problems.
- ✓ Feeding a high protein grain like lupins prior to joining at about 500 grams per day can help with his fertility.
- ✗ **Do not allow your ram to be over fed** or get to fat this can effect his short and long term fertility as well as his mobility.

With acknowledgment to Adam Mort of Hilltop for putting this together.

All Glenwood rams have been treated with the following:

- ✓ Vaccinated with 6 in 1 as lambs and a booster in 25/09/2026
- ✓ Drenched with Flexholt 3/9/2026
- ✓ Drenched with Tridectin Plus 25/9/2026
